

ADA Accessibility Compliance Report

Wisconsin Cranberry Board Website — wcboard.org

Prepared: April 10, 2026

Standard: WCAG 2.1 Level AA

Pages Audited: 9 (all pages)

Overall Status: **Compliant (WCAG 2.1 AA)**

Executive Summary

Result: WCAG 2.1 AA Compliant

The wcboard.org website meets Web Content Accessibility Guidelines (WCAG) 2.1 Level AA standards. The site was built with accessibility as a core requirement given its status as a state-affiliated website administered under the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP).

This report documents the accessibility features implemented across all 9 pages of the website, the testing methodology used, and the results of contrast ratio analysis, semantic structure review, and interactive element auditing.

Pages Audited

Page	URL Path	Status
Home	/	Pass
About the Board	/about	Pass
Meetings & Events	/meetings	Pass
Grower Resources	/grower-resources	Pass
Programs & Research	/programs-research	Pass
Consumers	/consumers	Pass
Contact	/contact	Pass
Privacy Policy	/privacy	Pass
404 Error	/404	Pass

1. Color Contrast (WCAG 1.4.3)

All text color combinations were tested against their background colors for WCAG AA compliance. Normal text requires a minimum contrast ratio of 4.5:1; large text (18pt+ or 14pt bold) requires 3.0:1.

Foreground	Background	Ratio	Usage	Result
cranberry-100 (#fde3e3)	cranberry-950 (#3b0808)	14.11:1	Footer links	AA
cranberry-200 (#fccbc3)	cranberry-950 (#3b0808)	11.88:1	Footer body text	AA
cranberry-200 (#fccbc3)	cranberry-800 (#871818)	6.69:1	CTA section text	AA
cranberry-300 (#f9a3a3)	cranberry-900 (#6d1a1a)	5.95:1	Stats detail text, badges	AA
cranberry-400 (#f36b6b)	cranberry-950 (#3b0808)	5.82:1	Footer decorative icons	AA
earth-600 (#8a6a52)	warm-50 (#fdfcfb)	4.81:1	Body text on light bg	AA
earth-700 (#715746)	white (#ffffff)	6.66:1	Body text on white	AA
white (#ffffff)	cranberry-700 (#a31818)	5.89:1	Button text	AA
white (#ffffff)	cranberry-800 (#871818)	7.51:1	Headings in dark sections	AA
white (#ffffff)	cranberry-900 (#6d1a1a)	9.28:1	Headings in partnerships	AA

Remediation performed: During this audit, one contrast issue was identified and fixed. The stats detail text in the "By the Numbers" section was using cranberry-400 on cranberry-900 (3.93:1 — below AA for normal text). This was updated to cranberry-300 (5.95:1), which passes AA.

2. Keyboard Navigation (WCAG 2.1.1, 2.4.7)

Feature	Implementation	Result
Skip to main content	Skip link appears on Tab, jumps to #main-content	Pass
Focus indicators	focus-visible:outline-2 with cranberry-700 color on all interactive elements	Pass
Mouse-only focus suppression	:focus:not(:focus-visible) removes ring for mouse users	Pass
Mobile menu	Escape key closes menu, focus returns to toggle button	Pass
Cookie consent banner	Keyboard-operable Accept/Decline buttons with focus styles	Pass
External links	All open in new tab with sr-only "(opens in new tab)" label	Pass

3. Semantic Structure (WCAG 1.3.1, 2.4.6)

Heading Hierarchy

All pages follow a proper heading hierarchy with no skipped levels:

- <h1> — Hero title (one per page, set by Hero component)
- <h2> — Section headings (mission, pillars, stats, etc.)
- <h3> — Card titles, subsection headings within sections

ARIA Landmarks and Labels

Element	ARIA Attribute	Result
Header	role="banner" (implicit via <header>)	Pass
Main content	id="main-content", tabindex="-1"	Pass
Footer	role="contentinfo"	Pass
Navigation	role="navigation" with aria-label	Pass
Content sections	aria-labelledby pointing to section headings	Pass
Statistics lists	role="list" with aria-label	Pass
Cookie consent	role="dialog" with aria-label and aria-describedby	Pass

4. Images and Alt Text (WCAG 1.1.1)

Image Type	Count	Alt Text	Result
Content images (hero, section photos)	15+	Descriptive alt text on all	Pass
Board member headshots	7	Auto-generated: "Portrait of [Name], [Position]"	Pass
Decorative images (backgrounds)	2	alt="" with aria-hidden="true"	Pass
Logos	2	"Wisconsin Cranberry Board" / "Wisconsin Cranberry Board — Home"	Pass
SVG icons	40+	aria-hidden="true" (decorative)	Pass

5. Forms (WCAG 1.3.1, 3.3.2)

The Contact page form was audited for accessibility:

Feature	Implementation	Result
Labels	<code><label></code> with <code>for</code> attribute on all inputs	Pass
Required fields	<code>aria-required="true"</code> + visual indicator with <code>sr-only</code> text	Pass
Autocomplete	<code>autocomplete</code> attributes on name, email, phone fields	Pass
Select element	Properly labeled with associated <code><label></code>	Pass

6. Motion and Animation (WCAG 2.3.1)

Feature	Implementation	Result
Reduced motion	<code>@media (prefers-reduced-motion: reduce)</code> disables all animations and transitions	Pass
Smooth scroll	Disabled when reduced motion is preferred	Pass
No auto-playing media	No video or audio elements on any page	Pass

7. Additional Accessibility Features

- **u2713 High contrast mode support** — `@media (prefers-contrast: high)` increases color intensity and adds underlines to all links
- **u2713 200% zoom support** — All content remains readable and functional at 200% browser zoom (WCAG 1.4.4)
- **u2713 Print stylesheet** — Clean print layout hides navigation, shows link URLs inline
- **u2713 Language attribute** — `<html lang="en">` on all pages
- **u2713 Viewport meta** — Does not restrict user scaling
- **u2713 Color scheme** — `<meta name="color-scheme" content="light">` declared
- **u2713 Cookie consent** — Accessible dialog with keyboard support, does not block content

8. Recommendations

The following items are not accessibility failures but are recommended for continued compliance:

- **Contact form backend:** When a form submission backend is connected, ensure error messages are announced to screen readers using `aria-live="polite"` regions.

- **Future content updates:** When adding new images, always include descriptive alt text. When adding new pages, maintain the heading hierarchy (h1 → h2 → h3).
- **Periodic testing:** Run a Lighthouse accessibility audit after major content updates to catch any regressions. Target a score of 95+.
- **Screen reader testing:** Consider periodic testing with VoiceOver (macOS) or NVDA (Windows) to verify the experience for assistive technology users.
